

# Midget Mustang – May 2018

- Mustang Information Pack: covers both M-I & M-II \$ 10.00
- Mustang Video: covers history, design, construction, kits \$ 5.50
- Info, Video, & Construction DVD package \$ 49.00
- Mustang Construction DVD: \$ 45.00  
Hundreds of construction pictures, finished aircraft pictures, kit pictures, FAA publications, and video clips. Requires a PC with DVD ROM drive.
- Midget Mustang Reference Drawing Set: \$45.00  
Construction drawings reduced to 11"x17" and folded in a 8-1/2" x 11" binder. No serial # and no construction manual but does include updates and the operating manual.
- Midget Mustang Drawing Set: \$ 185.00  
Construction drawings consist of 33 large size detailed drawings and templates. All bulkheads and ribs are full size and assembly drawings are detailed and easily read. The construction manual gives step-by-step instructions. It is possible to build the entire airframe with the information in this drawing set.
- M-IA Supplement: \$ 35.00  
These are drawings and a manual for installing the bubble canopy. The M-IA design makes the Midget look very much like a P-51 Mustang. Along with improved visibility the M-IA canopy also gives 1-2 inches more headroom and makes it easier to get in and out of the airplane.
- Complete Airframe Material Kit: \$11,900.00  
Contains the fabricated aluminum and steel parts for the airframe. Hardware, rivets, canopy, tailwheel assembly, main landing gear, formed skins, control surfaces, ribs, spars, bulkheads, and welded steel parts are all included. Many of the parts are prepunched for rivet holes. Hand tools are sufficient to complete the remaining work. The center section bulkhead containing the wing carry through structure is fully assembled and powder coated with the proper wing dihedral set. It should take about 1000 hours to finish assembly of the airframe less instruments, interior, paint, and lights. There are several options for factory completed components to further reduce the build time.
- Completed Wings Option: \$5910.00  
The wings are completely riveted and ready to paint. Ailerons and flaps are also completed. The riveted main wing spar option from the forward fuselage kit is required along with the actual wing kit. The wing tips are sold separately. Interior parts are treated for corrosion and the steel parts are powder coated. Conduit is installed for the wing tip lights and pitot system. This option will save over 275 hours for the average builder. The wet wing version is \$8,190 which will include the installed filler caps, and capacitance fuel probes.
- Partial Kits: (listed in the recommended order)
- Tailcone Kit - formed bulkheads, rolled belly skin, tailwheel assembly, and the rest of the parts for the tailcone.
  - Forward Fuselage Kit - from the firewall to the seatback including main wing spars, assembled main spar carry-through, formed firewall, instrument panel, flap control assembly, rudder pedal assembly, and control stick assembly.
  - Empennage Kit - including the fin, horizontal stabilizers, elevators, rudder, and control hinges/fittings.
  - Canopy Kit - mounting material and plexiglass canopy for either the M-IA or standard M-I versions.
  - Wing Kit - includes remaining wing components (no main spars), gear mounting parts, aileron parts, and flap parts.
  - Gear Assembly - aluminum gear legs and mounting tube assembly

Note:

Additional items not listed that are needed to complete the airplane include the engine & related systems, instruments, fiberglass components, and a few other miscellaneous items. Except for the engine components, the rest can be purchased for under \$5000 from Mustang Aeronautics or other suppliers.
